

## **New App “Cosmic Conductor” from Nick Hopman Lets Users Conduct the Starry Sky in Stunning Display of Light and Color**

*Cosmic Conductor from Nick Hopman lets people use their fingers to conduct the stars in a stunning display of light and color, and immerse themselves in a world of wonder and uplifting cosmic energy. The app is compatible with iPhone, iPod touch and iPad.*

iPhone, iPad and iPod touch users who gaze up at the night’s sky and wish they could ‘touch the stars’, can now bring their dream to life with the elegant and original new app [Cosmic Conductor](#).

Designed by Nick Hopman, Cosmic Conductor lets users create a stunning display of light and color by conducting the stars with their personal touch:

- One Finger = Comet Tail
- Two Fingers = Star Builder
- Three Fingers = Energy Waves
- Four Fingers = Ball of Stars (gather them up and watch them explode when fingers leave the screen)
- Five Fingers = Pause Screen (holds each star in position)

Plus, users who want to relax and unwind can toggle the app’s Tranquility Setting, and sit back and watch as their fingers create a magical visual spectacle. They can even make the stars ‘dance’ with them by playing their favorite song from their device’s library.

In addition, Cosmic Conductor is refreshingly easy-to-operate. Users can customize color and size spectrums, and activate the app’s menu simply by touching the screen’s corner. They can also take a picture of their unique starry sky and save it on their device, or share it with a friend so that everyone can enjoy a dose of wonder and uplifting cosmic energy.

“I’ve always been fascinated by the starry sky at night, and found that the cosmic energy of the experience to be uplifting and tranquil,” commented Nick Hopman, the app’s creator. “With Cosmic Conductor, my goal was to empower people around the world to connect with that experience in a new and different way. And based on the app’s unanimously positive feedback so far, it appears as though many people are enjoying the pleasure of conducting the stars!”

Cosmic Conductor, the delightful and creative new app that lets users conduct the starry sky in a stunning display of light and color, is available now in the App Store at <https://itunes.apple.com/ua/app/cosmic-conductor/id552113095?mt=8>. A no-cost version called Cosmic Conductor Free is also available, and a demo video is available at [https://www.youtube.com/watch?v=-\\_d12rX2Q\\_4](https://www.youtube.com/watch?v=-_d12rX2Q_4).
